# WE FIND WHAT IS HOLDING BETTER CARE BACK. THEN WE MAKE IT MOVE.

We uncover what is stopping patients, healthcare professionals and health systems from changing, then design and activate what will move them.

## 01 DECODE

Understand what is really happening

We identify how care actually happens: where frictions occur, where clinicians hesitate, and the key moments where evidence fails to translate into action. We decode the driving forces to generate change.

- Patient, caregiver and HCP research
- Behavioural drivers and barriers
- Segmentation, profiling and archetyping
- Experience and care pathway mapping
- Evidence synthesis, data analysis and social intelligence

## 02 DESIGN

Identify what needs to change

We analyse and define the behavioural domains in play — the forces that must be addressed at vital intervention points — and identify the right interventions, at the right time, in the right context and format to influence and bring about change.

- Launch readiness and adoption strategy
- Positioning and value propositions
- Behaviour change and experience strategy
- Customer engagement and omnichannel planning
- Market archetyping and programme blueprinting

## 03 DEPLOY

Execute with precision and power

We create compelling engagement and deploy across digital, media, channels and markets with the targeting, orchestration and measurement needed to demonstrate sustained impact and momentum.

- Medical communications and scientific storytelling
- HCP education, engagement and advocacy
- Patient support programming and adherence
- Disease awareness and creative campaigns
- Omnichannel playbooks and digital engagement

### WHAT THIS HELPS YOU ANSWER

1. Which behaviours will determine launch success?
2. Where is adoption most likely to stall, and why?
3. What will move people from awareness to action?
4. How will we know whether behaviour is changing?

JOINED-UP THINKING
FOR A HEALTHIER TOMORROW

## FROM PATHWAY FRICTION TO MARKET MOMENTUM

Identify the frictions. Decode the forces. Design the intervention. Demonstrate sustained impact.
